# USE EQUIVIO ZOOM FROM WITHIN RELATIVITY

kCura and Equivio have collaborated to fully integrate Equivio Zoom, an end-to-end e-discovery platform for predictive coding and analytics, within Relativity. The Equivio functionality is accessed via a dedicated Equivio Zoom tab in the Relativity GUI.

Available in the Relativity Ecosystem, the Equivio Zoom tab allows users to launch and use Equivio without ever leaving the Relativity GUI. This Zoom tab approach means that Relativity is now "Zoom-ready." As a result, implementation of Equivio with Relativity becomes a non-issue. Relativity users can take full advantage of Zoom's best-of-breed suite of e-discovery analytics and predictive coding applications, all within the Relativity GUI and workflow. The Zoom tab in Relativity supports the full range of Zoom functionality, including Relevance for predictive coding, clustering, near-duplicates, email threads and language detection.

## STREAMLINED DATA FLOW

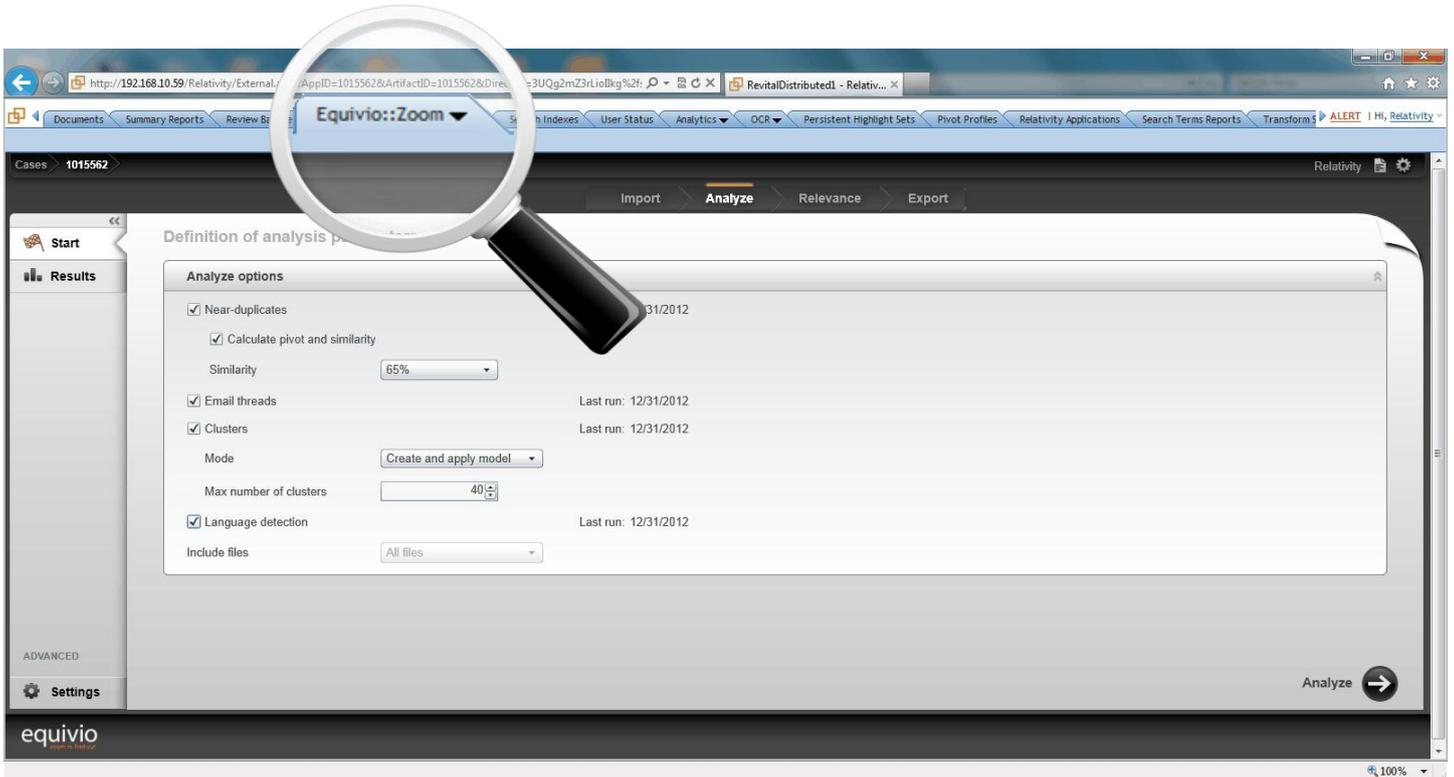

The integrated GUI and data flows make it easy for Relativity users to access the Zoom functionality from within the Relativity review environment. This integration provides seamless access to all Zoom functionality and data from the Relativity GUI, creating a straightforward, intuitive user experience.

The tight integration of the two technologies provides users with several key advantages:

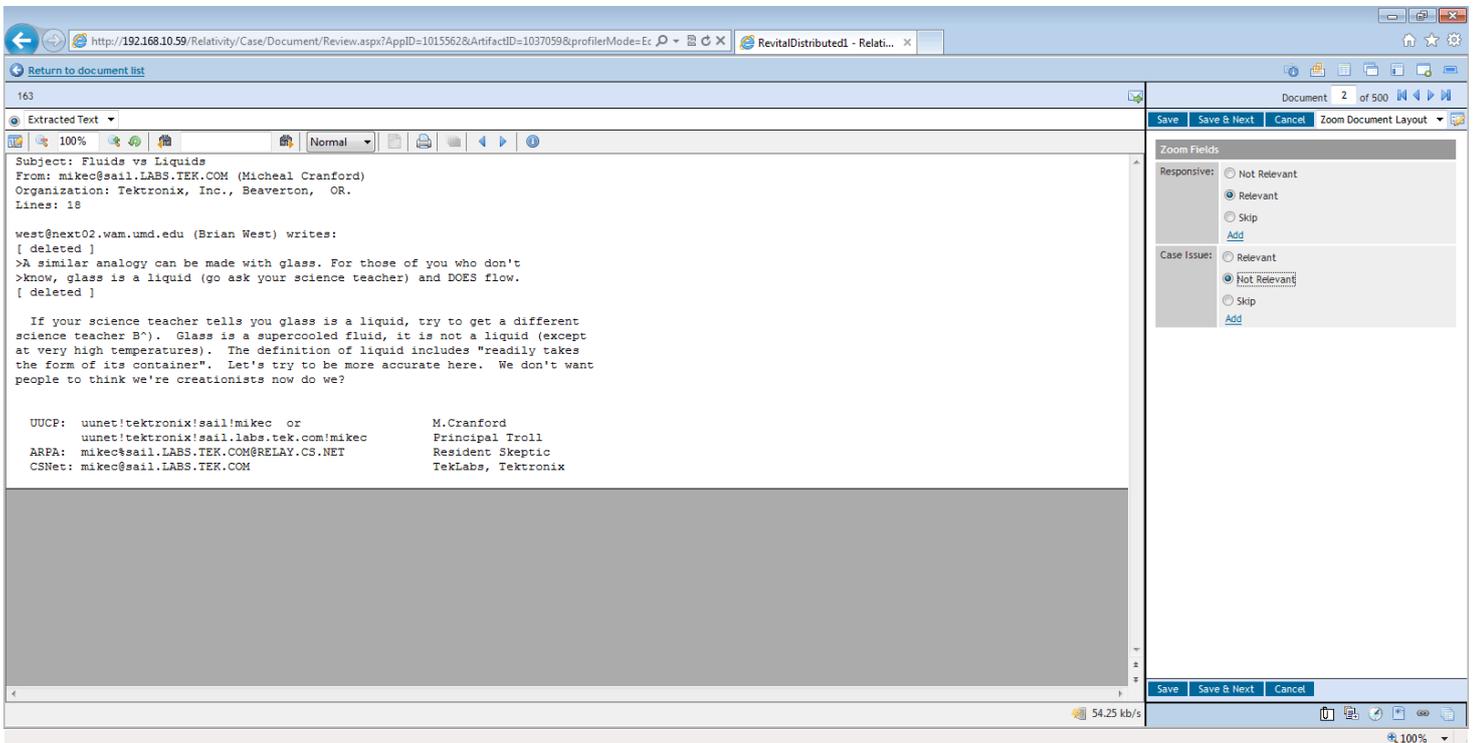

- **Unified GUI** – With Zoom fully embedded within Relativity, users can use Zoom for all their predictive coding and analytical needs, while remaining within the familiar Relativity "look and feel."
- **Short learning curve for Relevance training** – Tagging of sample documents for relevance is performed using the standard Relativity review GUI.
- **Seamless data flow** – Zoom directly accesses and updates the Relativity database to create an efficient and seamless workflow that simplifies data handling, saves time and reduces the risk of errors.
- **Simple to deploy** – Automated installation and tight integration ensure straightforward setup and implementation of the Equivio Zoom tab and functionality.

The Zoom tab in Relativity is available to joint Equivio-Relativity users, and is activated via the Equivio Zoom license.

Further details are available on the [Relativity Ecosystem](#).

*Using the Equivio Zoom tab to analyze documents*

*Zoom tab integration allows users to train Relevance in Relativity's native file viewer*

## BOTTOM LINE: SEAMLESS INTEGRATION, OUTSTANDING USER EXPERIENCE

The integration of the Equivio Zoom tab in Relativity enables reviewers to take advantage of Zoom's powerful predictive coding and analytics technology within Relativity. This seamless integration creates an all-in-one experience for Relativity and Zoom users.

---

### ABOUT EQUIVIO ZOOM

Zoom combines Equivio's best-of-breed Relevance application for predictive coding, with advanced analytics including clustering, near-duplicates, email threads and language detection. Zoom can be used for early data assessment as well as significantly reducing review set volumes and enabling prioritized review. The Zoom components are seamlessly integrated on a unified web-based platform for easy access and use. The unified platform approach eliminates the need for moving data between applications, shortening data handling cycles and reducing the risk of errors.

### ABOUT RELATIVITY

[Relativity](#) is a web-based platform for the processing, review, analysis, and production of electronic data. Relativity has more than 70,000 active users worldwide from organizations including the U.S. Department of Justice and 95 of the top 100 law firms in the United States. Relativity's features include complete processing capabilities, image and native file review, diverse coding options, flexible workflow capabilities, integrated productions, foreign language support, text analytics, and visual data analysis, all available as an on-premises installation or as an on-demand, hosted solution through a global network of partners.

## ABOUT EQUIVIO

Equivio develops text analysis software for e-discovery. Users include the DoJ, the EPA, KPMG, Deloitte, plus hundreds of law firms and corporations. Equivio offers Zoom, an integrated web platform for analytics and predictive coding. Zoom organizes collections of documents in meaningful ways. So you can zoom right in and find out what's interesting, notable and unique. Request a demo at [info@equivio.com](mailto:info@equivio.com) or visit us at [www.equivio.com](http://www.equivio.com).
