

Mobile Solutions with
Relativity Binders

1

*I want to **access my documents on-the-go** whether or not I am connected to the Internet.*

Access your case documents both online and offline with Relativity Binders. Back up your annotations and download new binders when you reconnect to the Internet.

2

*I want to **find a document quickly** even though I don't remember the specific binder name or workspace title.*

With global search, Relativity Binders locates exactly what you need faster than ever.

3

*I want my relevant documents quickly **without the logistical hassle** of printing and shipping.*

Relativity Binders delivers your case documents in minutes, letting you—and your team—get back to work.

4

*I want to **view my documents' metadata** and team's work product while on-the-go.*

Relativity metadata fields and coding information is visible in Binders, right next to your document for easy reference.

5

*I want to **quickly** send my team instructions and feedback after reviewing documents.*

Send your annotations—notes, drawings, and highlights—via email.

6

When reviewing lengthy documents on-the-go, I want to remember the last page read.

With Relativity Binders, document tabbing keeps track of the last page you viewed.

7

*I want to use Binders, but I'm worried **sensitive information** may fall into the **wrong hands**.*

Relativity Binders utilizes industry-standard security practices and supports MobileIron integration for additional control.

8

*I want to know when changes have been made to my binders so I always have the **most up-to-date** information.*

In-app notifications provide Relativity Binders users up-to-date information on newly added documents and binders, and upcoming binder expirations.

9

*I just arrived at the office
and **want to finish reviewing
the binder on my computer.***

Continue accessing your documents on your tablet,
laptop, or desktop with Relativity Binders on the Web
from any browser.

For more information on how you can start using these features today, **download Binders** and check out the rest of the **mobile toolkit**.
